CSE15_Lab5

Lab Report Week 5

For this week, there were 3 commands to choose from. I have decided to choose the "find" command and find alternatives for it

Option: -print

Finds files and returns file names (sorry)

```

technical/plos/pmed.0020278.txt
technical/plos/pmed.0020281.txt
```

Let's narrow it down:

```
[cs15lfa22ic@ieng6-203]:docsearch:263$ find technical/911report -print
technical/911report
technical/911report/chapter-1.txt
technical/911report/chapter-10.txt
technical/911report/chapter-11.txt
technical/911report/chapter-12.txt
technical/911report/chapter-13.1.txt
technical/911report/chapter-13.2.txt
technical/911report/chapter-13.3.txt
technical/911report/chapter-13.4.txt
technical/911report/chapter-13.5.txt
technical/911report/chapter-2.txt
technical/911report/chapter-3.txt
technical/911report/chapter-5.txt
technical/911report/chapter-6.txt
technical/911report/chapter-7.txt
technical/911report/chapter-8.txt
technical/911report/chapter-9.txt
technical/911report/preface.txt
[cs15lfa22ic@ieng6-203]:docsearch:264$
```

I made a new empty directory just to make sure only directory gets printed

```
[cs15lfa22ic@ieng6-203]:docsearch:265$ find technical/newdirectory2
technical/newdirectory2
[cs15lfa22ic@ieng6-203]:docsearch:266$
```

Option: -name (file/directory name)

This find option allows user to find the name of a file or a directory. The command searches for any file or directory that matches the argument after "-name". There are no subtext searches.

Here is an example of finding nothing:

```
[cs15lfa22ic@ieng6-203]:docsearch:188$ find technical -name dog
[cs15lfa22ic@ieng6-203]:docsearch:189$
```

Another example

```
[cs15lfa22ic@ieng6-203]:docsearch:190$ find technical -name biomed
technical/biomed
```

Here is an example of where "government" exists but "gov" returns nothing

```
cs15lfa22ic@ieng6-203]:docsearch:199$ cd technical
[cs15lfa22ic@ieng6-203]:technical:200$ ls
911report  biomed  government  plos
[cs15lfa22ic@ieng6-203]:technical:201$ cd ..
[cs15lfa22ic@ieng6-203]:docsearch:202$ find technical -name gov
[cs15lfa22ic@ieng6-203]:docsearch:203$
```

Option: -empty

Finds all empty folders and files in the directory and sub-directories. This is useful if you want to quickly find empty files to add into it.

```
[cs15lfa22ic@ieng6-203]:docsearch:207$ find technical -empty
[cs15lfa22ic@ieng6-203]:docsearch:208$
```

This means there are no empty files or directories. To circumvent this, we will make empty directories of our own.

```
[cs15lfa22ic@ieng6-203]:docsearch:214$ cd technical
[cs15lfa22ic@ieng6-203]:technical:215$ mkdir newdirectory
[cs15lfa22ic@ieng6-203]:technical:216$ mkdir newdirectory2
[cs15lfa22ic@ieng6-203]:technical:219$ cd ..
[cs15lfa22ic@ieng6-203]:docsearch:220$ find technical -empty
technical/newdirectory
technical/newdirectory2
[cs15lfa22ic@ieng6-203]:docsearch:221$
```

Now, let's say we make an empty file:

```
[cs15lfa22ic@ieng6-203]:docsearch:221$ cd technical/newdirectory
[cs15lfa22ic@ieng6-203]:newdirectory:222$ vim newfile.txt
[cs15lfa22ic@ieng6-203]:newdirectory:223$ cd ../..
[cs15lfa22ic@ieng6-203]:docsearch:224$ find technical -empty
technical/newdirectory/newfile.txt
```

```
technical/newdirectory2
[cs15lfa22ic@ieng6-203]:docsearch:225$
```
